

## **FOR IMMEDIATE RELEASE**

### **EXPANDING THE FUTURE OF ENERGY STORAGE**

Joint cooperation with world's major exporter of Lithium Iron Phosphate (LPO) Batteries

**DECEMBER 4, 2017** - Guangxi Aerospace Beidou New Energy Technology Co. Ltd. is further expanding its business cooperation with industry leaders in the energy storage industry.

Guangxi Aerospace Beidou has signed a cooperative agreement with Masterhold Int'l Co Ltd, a Taiwan Enterprise, to establish a cooperative operation limited company, called Guangxi Aerospace Beidou Masterhold Int'l High-energy Battery Technology Co., Ltd. at Guangxi Wuzhou Wanxiu District, China.

With this agreement, the cooperative company will be involved in the production of ultra-capacitor based energy storage products and applications.

Both will work together in the production of world-class Ruthenium and other mixed metal oxide super capacitors with lithium battery technology, power lithium battery module, Battery Management System (BMS) and Battery Rescue Charger System and Anti-Theft BMS design.

The application of these products are primarily used in the Electric Vehicles (EV) including motorcycles, golf buggies, automobiles and also solar power projects.

The combination of Ruthenium super capacitors and LPO batteries will make a super battery guaranteed **to last up to eight years in use.**

**This is unprecedented in the energy storage industry.**

"The cooperation between Guangxi Aerospace Beidou and a prominent Taiwanese LPO batteries exporter is a testament to the international quality standard of the Beidou super capacitor technology," said Mr Nong Youhua, Chairman of Guangxi Aerospace Beidou New Energy Technology Co Ltd.

He said the cooperative agreement is many that is lined up to spur the growth of energy storage industry in China and eventually, worldwide.

Among the application of the super capacitor based battery products will be used to power up public buses, which the cooperative company will be producing 100 units per month for this purpose.

The super capacitor based energy products will also be sold to the international market including Hong Kong, Macao, ASEAN and Middle East countries.

**About *Guangxi Aerospace Beidou New Energy Technology Co Ltd*, (Guangxi AeroBeidou)**

Guangxi AeroBeidou is incorporated in China and is the company that owns 28 international patents and the super-batteries and super capacitor cell manufacturing facility in Wuzhou City, Guangxi Province, People's Republic of China.

**About Masterhold Int'l Co Ltd**

Masterhold Int'l Co Ltd was established in November 2005 and started to put into research and development, production and marketing work to develop mainly lithium iron phosphate batteries, multi-display cards and multi-detection alarm device. The developed products have not only earned the affirmation from domestic manufacturers but also obtained various patents. The developed product has breakthrough in terms of characteristic, eco-friendliness, safety, energy conservation and carbon reduction and has a lifespan more than five years, all which is lacking in conventional lead-acid battery. In addition, the special design of the product's protection panel has obtained patents in Taiwan, China, Japan and Germany and gradually extending the patent applications in United States, Canada and Europe.
